# SMART WINDOWS

## WINDOWS & DOOR

### Sliding Doors

These doors are the best for big apertures. With multiple locking system, these doors are very safe and convenient to use. 2 track 2 panel doors and 3 track 3 panel doors are commonly used sliding doors.

### Twin Sash Windows

Amongst our premium series, these windows are for people who love natural air. The twin sash window is a combination of inward and outward opening window with a provision security grill in between. The inward opening side is used for mosquito mesh.

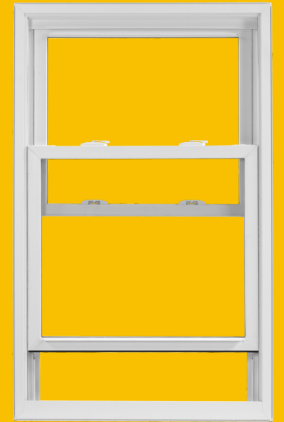

### Tilt & Turn Windows

These windows provide a tilt option for secure ventilation and that accepts a full range of hardware—in line with the latest European standard. They help in ventilation during winters.

### Vertical Sliding Windows

Vertical sliding windows help in areas where openings are not possible, thus allowing ventilation.

### Casement Windows

The perfect way to add charm to house is with the casement doors. With high security features such as multipoint locking system and strong hinges, these doors are 100% safe.

### Sliding Windows

These windows are perfect for places with limited opening space. The sliding windows are smooth to roll and easy to maintain even after being the most cost effective solution for any home. Commonly used, sliding windows are two track two panel windows and three track three panel windows.
